

## Street Hash Instructions

Follow road until you reach a junction with a control circle on. Check the name of the road that that circle is on.

You may need to run along the road a bit to find a road name sign.

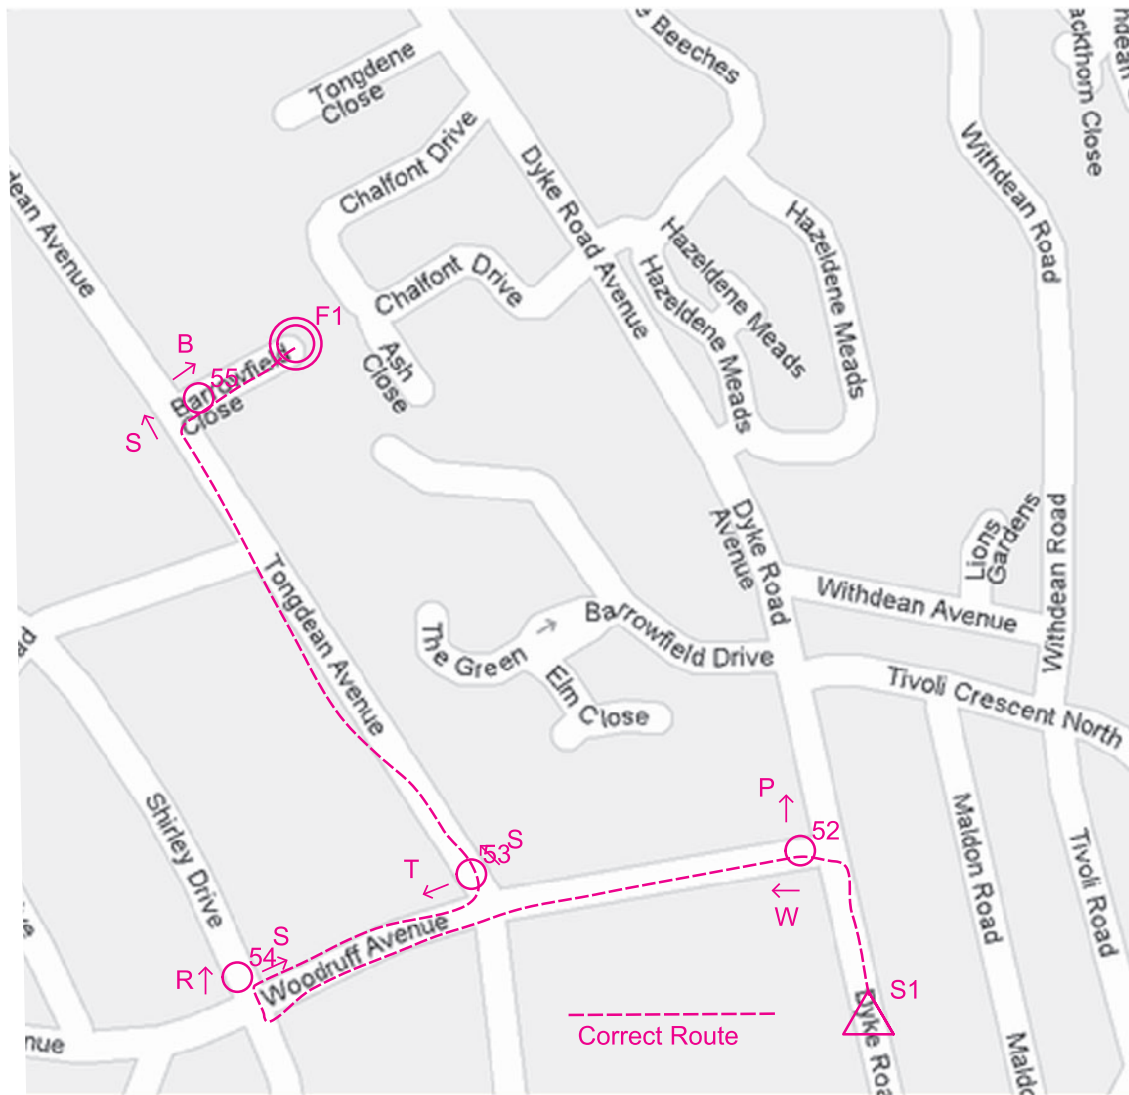

Proceed in the direction of the arrow labelled with the letter that represents the first letter of the road name.

Ignore "The" when considering road names

If you are directed back to a control point that you have already visited then take the other arrowed direction to the one that you took last time. If you end up at the same control point for a third time then you have gone wrong somewhere.

If you meet someone coming back down a road towards you they have found a dead end. You can turn round at this point.

At junctions without circles either carry on or follow the arrows.

First circle is on Woodruff Avenue- W arrow says turn left (onto Woodruff Ave)  
Second circle is on Tongdean Avenue - T arrow says carry straight on  
Third circle is on Shirley Drive - S arrow says go back the way you have just come  
Back to Tongdean/Woodruff circle so this time follow other (S) arrow  
Final circle is on Barrowfield - B arrow says turn right and thus to finish.

NOTE that the actual competition map will NOT have the street names on.
